

# Capabilities Statement

## Approved Assessments, LLC

Approved Assessments LLC delivers comprehensive mental health assessments to Veterans, Military Service Members, Public Sector Employees, and their families. We offer full bio-psycho-social mental health assessments to U.S. Federal Government Agencies, harnessing a nationwide solution to address the understaffing and lack of mental health resources in America.

Leveraging advanced technology to deliver immediate access to mental health resources, we deliver a whole-health outlook that enhances the quality of care and treatment from the first visit.

## Core Competencies

- Our **streamlined** assessment facilitates immediate services to the patient with advanced mental health needs.
- This **rich pre-appointment, comprehensive, brain assessment** bridges the gap between patient and provider expediting services.

## Past Performance

- Pilot study at the **Cheyenne River Sioux Tribal Jail** has shown Approved Assessments to be **more accurate** and **efficient** than traditional in-person assessments.
- The **University of Tampa Counseling Services** reduces burden of staff through enhanced workflow.
- **Douglas County Department of Correction's** Officer Prevention Program screens officers during training to facilitate education for officers at risk.
- **WellFully Children's Home** screens all youth with AA to assess their biological, mental, literacy, traumatic, and substance histories for a comprehensive brain report.
- **Emergency Youth Shelter** on Pine Ridge Indian Reservation:
  - Screens all wayward teenagers within days of arrival to allow for **quicker implementation of treatment**.
  - **Private Therapists** use our tool to screen all new patients reducing no-shows and maximizing their services during first visits.
  - **Anpetu Luta Otipi**: This treatment center uses AA to screen all tribal members who seek help for substance abuse.

## Differentiators

- No funnel to treatment services. Our enhanced screening **strengthens quality** of services on the first visit. We separate the screening from services to reduce bias.
- Assessment taken from any location, **any time**.
- Harnesses **high truthfulness scores** due to artful collection of sensitive information. (See pilot study)
- Decrease survey burden and improve documentation process protecting MH staff from burnout.
- Assesses an individual's **whole health - bio-psycho-social, substance use, mental health, trauma, etc.**
